

Amendments to the Claims

This listing of claims will replace the originally filed claims in the application.

Listing of Claims:

Claims 1 – 6 (cancelled)

Claim 7 (new): A method for revamping a combined system consisting of a blast furnace supplied with oxidizing fluid issuing at least partially from an air gas separation unit (ASU), wherein more than 50% of the flow from the blower feeding the blast furnace before revamping is injected into a cryogenic air gas separation unit in order to produce oxygen with a purity above 90% by volume of O₂ fed to the blast furnace, the blower air flow rate and/or pressure of the air issuing from the blower being controlled by a controller which measures this flow rate and/or pressure at the inlet and/or outlet of the air cleaning stage, placed upstream of the separation unit, in order to control the flow rate or pressure of the air issuing from the blower, the blast furnace feed fluid consisting of pure oxygen or oxygen diluted with air produced by the cryogenic separation unit.

Claim 8 (new): The method of claim 7, wherein the blower flow rate is controlled by a controller of which the setpoint is calculated from the flow rate and/or pressure characteristics of at least one of the fluids produced by the ASU.

Claim 9 (new): The method of claim 7, wherein the air issuing from the blower is cooled to a temperature below 50°C before being recompressed in a second compressor.

Claim 10 (new): The method of claim 7, wherein the blower is controlled using a FIC controller of which the measurement and setpoint derive from one of the fluids produced by the ASU.

Claim 11 (new): The method of claim 7, wherein the blower is controlled by a PIC controller of which the flow rate or pressure measurement and of which the setpoint value are determined from the fluid entering the second compressor.

Claim 12 (new): The method of claim 9, wherein the second compressor is controlled by a FIC controller, the measured parameters and setpoint issuing from the flow rate and/or pressure measurement of the ASU.
